
Flue-Cured Tobacco News - Flue-Cured tobacco producers are reminded that the Flue-Cured Markets should open around August 15.

Last week all flue-cured producers were sent a postcard (MQ 32). This postcard asked producers if discount variety tobacco was planted; if DDT, TDE, toxaphene or endrin was used on the tobacco and if Maryland Tobacco was planted on the farm. Before a producer can get his Marketing Card, he must answer the questions on the postcard, sign, date and return it to the ASCS Office. After the postcard is returned to the ASCS Office and the producer receives his Marketing Card he is eligible to market his tobacco at the warehouse which he designated earlier in the year.

If a producer wishes to redesignate his tobacco to a different warehouse during the 1978 crop year he may do so during the following periods:
July 31 - August 4
August 28-September 1
October 2 - October 5
October 30 - November 3
November 27 - December 1

Tobacco Regulations Concerning Suckers - Tobacco marketing regulations prohibit the harvesting of a second crop of tobacco (except burley). A second crop of tobacco is the harvesting from the same plants or different plants from the same acreage in any calendar year. The penality for second crop harvesting (suckers) is a reduction in allotment for next year by the amount of acreage from which the second crop (suckers) was harvested.

Grain and Wet Storage Loan Program - Do you have enough grain or wet storage space on your farm? If not, why not stop by the ASCS Office and let us explain our loan program to you. ASCS can lend up to 85% of the cost of eligible equipment at an interest rate of 7% per year. Terms of repayment can be arranged from five to eight years with equal annual installments plus interest computed on the unpaid balance.

Commodity Loans - Farmers that are interested in obtaining loans on harvested wheat, feed grains and soybeans should contact the ASCS Office. This program loans the farmer working capital while waiting for better prices before selling their commodities. The interest rate for 1978 crop loans is 7% per annum and the loan rates per bushel are as follows:

Barley	$1.60
Corn	$2.17
Oats	$1.13
Rye	$1.83
Grain Sorghyn	$1.91
Soybeans	$3.37
Wheat	$2.30

HINTS FOR HOMEOWNERS

CHOOSING A GOOD ROOF

Your roof may not be caving in, but if your home is more than 15 years old, your roof may well need to be repaired or replaced. Here's how to select the safest and best-looking roof for your needs.

Choose an asphalt roof. More than 85 percent of all the roofs on American homes are now covered with asphalt shingles.

The more a shingle weighs, the longer it lasts. Standard shingles weigh about 240 pounds per 100 square feet and last approximately 15 years. Heavyweight shingles, like GAF Timberline, weigh approximately 330 pounds per 100 square feet and last up to 25 years.

If your roof is a mess, don't raise the roof. RAZE the roof!

Shingles differ in appearance as well as weight. Some shingles give the roof a long, sweeping appearance that complements ranch-style homes. Heavy weights, like Timberline shingles, that resemble traditional wood shingles go well with Tudor, modern, Dutch colonial and split-level design homes.

Asphalt shingles come in a wide range of colors. They are fire and wind resistant and come with a warranty, like GAF's, ranging up to 25 years.
